Emergency Scenarios

Global emissions peak in 2015. Drop by 50 to 80% by 2050

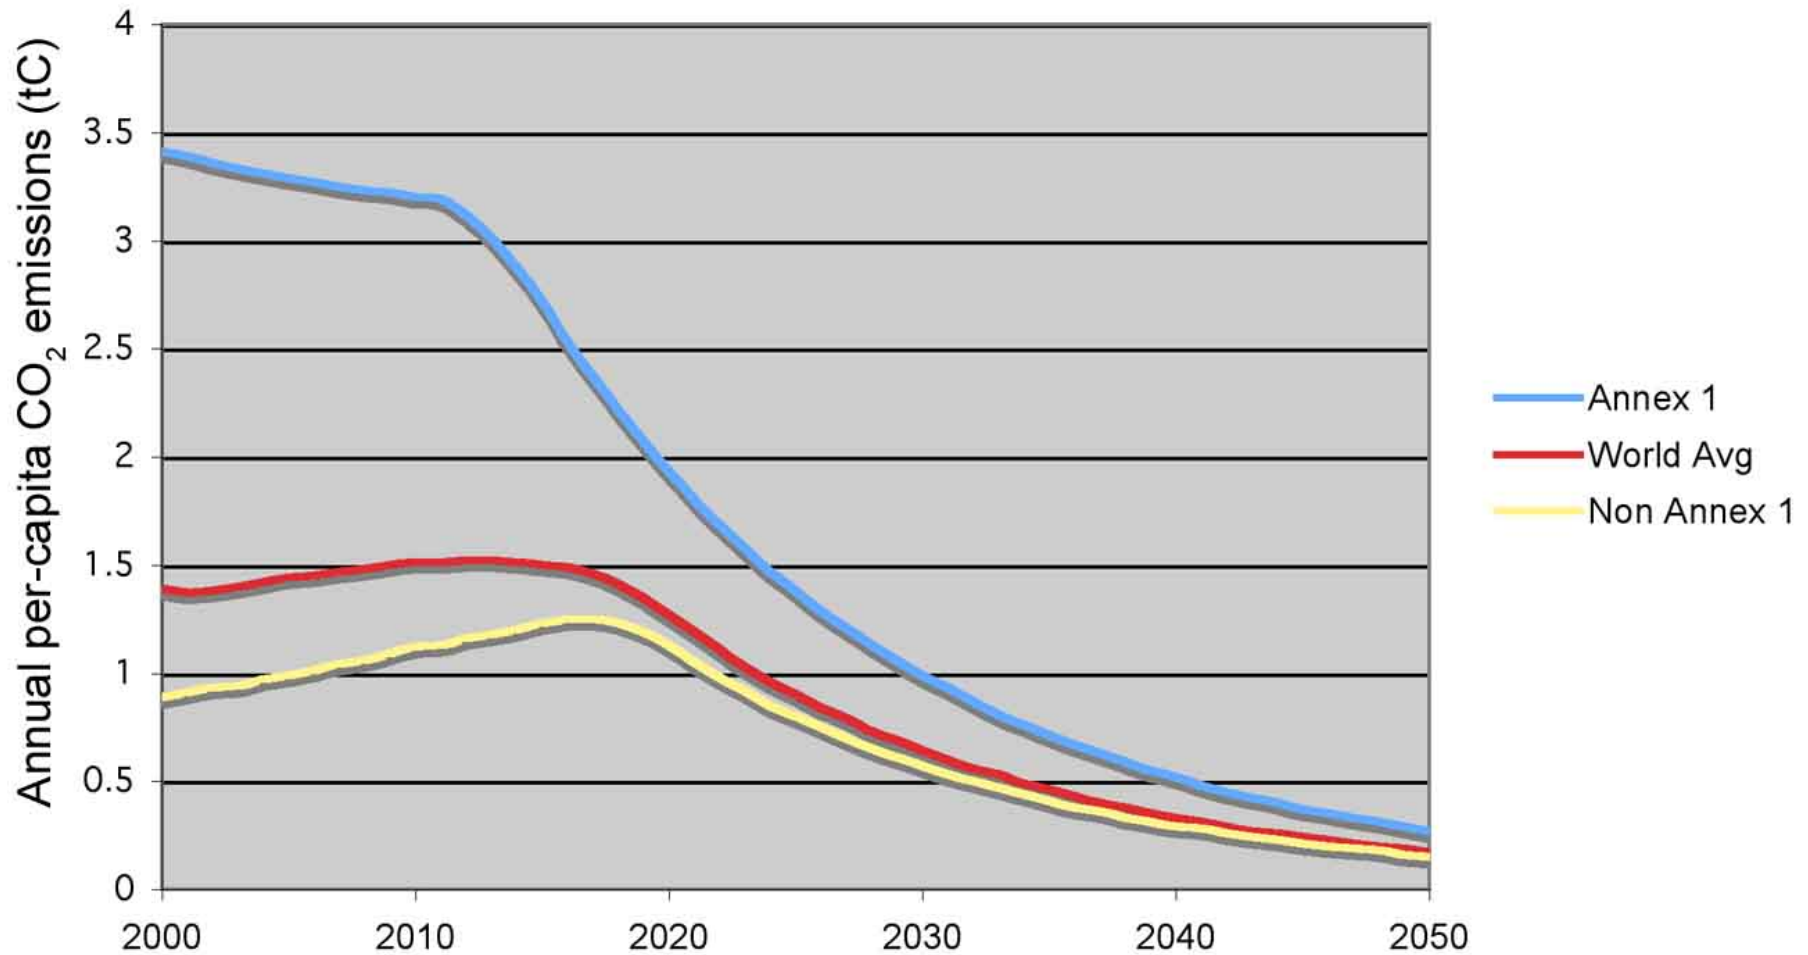

What's Left for the South?

What's Left for the South?

In Per Capita Terms

Greenhouse Development Rights

A climate protection framework designed to support an **emergency climate stabilization program**, while at the same time preserving **the right of all people to reach a dignified level of sustainable human development free of the privations of poverty**
